BETTER THERAPIES AND
ASSESSMENTS

**Horizon
Europe**

THE NEXT EU RESEARCH & INNOVATION
PROGRAMME (2021–2027)

HORIZON EUROPE
TOPICS
CLUSTER 1 - HEALTH

HORIZON-HLTH-DISEASE-2021-04-01: Comparative effectiveness research for healthcare interventions in areas of high public health need - betthera delivers assessments of innovative health technologies (HTAs) at national level and accelerate the practical implementation of the results. betthera developed 2 models which convert social and healthcare impacts to metrics. Those models could be enlarged with new data for the cost of intervention. We are particularly interested in CEE countries and in searching of inflation point for introduction of new methods.

HORIZON-HLTH-DISEASE-2021-04-02: Building a European innovation platform for the repurposing of medicinal products - Transparent, evidence-based selection mechanisms for prioritisation of re-purposing projects, based on results of cost benefit calculation, cost estimation of the next steps, probability estimation. betthera deep experience is in rare diseases and in age-related diseases.

HORIZON-HLTH-DISEASE-2021-04-04: Artificial Intelligence for treatment and care - The economical assessment of health outcomes for optimised personalised treatments and a risk assessment linked to various AI solutions. betthera has experience of the cost evaluation of robotic, AI and medtech solutions for Alzheimer and hearth failure patient care.

HORIZON-HLTH-CARE-2021-05-02: Data-driven decision-support tools for better health and care delivery and for policy-making - HTA and cost-effectiveness of individual interventions enabling the evidence-based participative decision-making processes and the design of the overall decision system.

HORIZON-HLTH-IND-2021-07-02: New payment models for cost-effective and affordable health innovations/new models of pricing - Cost-effectiveness and budget impact, including long term intended and unintended consequences of pricing and reimbursement decisions.

and others e.g.: HORIZON-HLTH-TOOL-2021-06-03: Innovative tools for use and re-use of health data or HORIZON-HLTH-TOOL-2021-06-02: Next generation advanced therapies to treat highly prevalent and high burden diseases with unmet needs – Where betthera could perform the Cost Benefit Analysis (CBA) to show positive impact on society, describe all positives and negatives in qualitative way.

HORIZON-HLTH-ENVHLTH-2022-04-01: Methods for assessing health-related costs to environmental stressors - betthera has experience with economic and health modelling in policy impact assessments and policy evaluation ; integrative socio-economic assessments and cost benefit analysis – we can use standard methods, but also provide system modelling of impact on society. We have experience in calculation of DALYs (Disability Adjusted Life Years) or QALYs (Quality Adjusted Life Years).

HORIZON-HLTH-ENVHLTH-2022-05-two-stage-01: The role of environmental pollution in non-communicable diseases - betthera can provide case studies to demonstrate the added societal value of tools, methodologies and guidelines developed and the implementation of resulting actions to decrease health impacts of exposures.

HORIZON-HLTH-DISEASE-2022-06-two-stage-01: Improved palliation and end-of-life care - Calculation of (cost-) effectiveness of palliative or end-of-life care services and design of the decision enabling tool for patients and their families

HORIZON-HLTH-CARE-2022-08-01: Pre-commercial procurement of innovation for environmentally sustainable and low-carbon health and care systems - Description of societal aspects connected with solutions focused on challenges and opportunities specific to the health and care sectors, particularly in adoption of green healthcare solutions

HORIZON-HLTH-CARE-2022-08-03: Public procurement of innovative solutions (PPI) for building the resilience of health and care systems in the context of recovery - betthera can perform evaluation of social and economic impact of innovative solutions (PPI) for building the resilience of health and care system by using Cost benefit (CBA) method and Budget Impact (BIA) methods.

HORIZON-HLTH-CARE-2022-08-04: Better economic foresight, financial planning and procurement/contractual strategies for health systems - betthera can lead or co-lead work towards all expected outcomes for the description of contractual strategies and financial evaluation. To enable stronger co-operation between primary care and public health services, long-term sustainable financing mechanism for local- and municipality-run promotion programmes.

HORIZON-HLTH-TOOL-2022-11-02: New methods for the effective use of real-world data and/or synthetic data in regulatory decision-making and/or in health technology assessment - betthera has experience with HTAs and therefore can be qualified partner³ for quantification of societal impact and methodologies used. And so contribute to the regulator decision making process and improvements.
